**Optimas®**

## Optimas® Kerb-Screed

### Your advantages

- Much easier concrete base preparation
- Time saving
- Low manpower requirements
- Simple assembly

Quick and easy assembly of Kerb-Screed guarantees minimal labor. Work can start immediately!

One person pushes Kerb-Screed with two handles on pulleys over already installed kerbs.

Kerb-Screed is guided sideways by two adjustable pulleys. This system warrants ideal alignment of that unique tool.

1.20 m of concrete base is prepared per work cycle.

With this system we offer an exact work performance with low effort and significant time saving.

#### Technical data:\*

Length: 2,85 m  
(Foldable for transport purposes to 1,6 m)

Gewicht: 17 kg

Adjustment height: 190 mm – 340 mm

Shield width: 270 mm

Application:  
Concrete base preparation for kerbs.

\*Technical changes reserved
